at Rs. 480,000, or £48,000, and the revenue derived by Government from the quarries was Rs. 67,266, or £6726. In addition, the Khásí Chiefs receive a revenue from this source of more than £2000.

IRON.—The smelting of iron was once the chief industry in the Khásí Hills, and a considerable quantity of the metal used to be exported into Sylhet, both in the crude and the manufactured state. Recently, however, this industry has almost died out, in the face of the competition of the superior article imported from England and sold in the plains at a cheaper rate. The indigenous methods of extracting, washing, and smelting the ore have been minutely described by Professor Oldham. The following description is taken from Mr. Allen's Report, dated 1858, at which date the annual export of smelted iron was estimated at 45,000 *maunds*, valued at Rs. 67,500, or £6750, at the rate of Rs. 1. 8 per *maund*: —'The ore is said to be most abundant and of the best quality in the State of Khrim, especially at the villages of Nongkrím and Noyandri. A few iron articles, such as *dáos* or hill knives, *koddlis* or mattocks, spear and arrow-heads, are manufactured by the Khásí smiths in the Hills; but the greater bulk of the smelted iron is sent to the plains for sale in circular lumps weighing about 4 or 5 *sers*. These lumps, called *bird*, sell at Chhaták for from Rs. 1. 4 to Rs. 1. 6 per *maund*. The best iron, however, which is beaten into bars called *peti*, sells for from Rs. 1. 10 to Rs. 1. 12 per *maund*. Khásí iron is preferred to English, in consequence of its greater malleability. It is much used by the native boat-builders of Sylhet and the neighbouring Districts to make fastenings for the timbers of their boats. When brought into the market, it is more than half dross, and it is this circumstance which renders the iron trade unprofitable. The cost of carriage from the Hills to the plains is about 6 *dnnás* per *maund*; and the traders, who are all Khásiás themselves, affirm that they get an average profit of only 2 *dnnás* per *maund*.' The tables of trade for 1876-77 return no smelted iron as exported from the Hills, but Rs. 7000 of iron implements exported, against nails and ironmongery imported to the value of Rs. 18,000.

THE MANUFACTURES of the District, besides iron, consist of coarse cotton and *rundia* cloth, plain silver work, rude implements of husbandry, netted bags made of the fibre of the pine-apple, common pottery, and mats and baskets. With the exception of the
